The world of cinematography has changed more in the last few years than it has since it has in 1929, when sound recording was introduced. New technology, new tools and new methods have revolutionized the art and craft of telling stories visually. While some aspects of visual language, lighting and color are eternal, shooting methods, workflow and cameras have changed radically. Even experienced film artists have a need to update and review new methods and equipment. These change affect not only the director of photography but also the director, the camera assistants, gaffers, and digital imaging technicians. Cinematography: Theory and Practice covers both the artistry and craftsmanship of cinematography and visual storytelling. Few art forms are as tied to their tools and technology as is cinematography. Take your mastery of these new tools, techniques, and roles to the next level with this cutting-edge roadmap from author and filmmaker Blain Brown. Whether you are a student of filmmaking, just breaking into the business, currently working in the industry and looking to move up to the next level, or an experienced professional who wants to update their knowledge of tools and techniques, this book provides both a basic introduction to these issues as well as more advanced and in-depth coverage of the subject. The companion website features additional material, including lighting demonstrations, basic methods of lighting, using diffusion and other topics. Topics Include: Visual language Visual storytelling Continuity and coverage Cameras and digital sensors Exposure techniques for film and video Color in-depth Understanding digital images Waveform monitors, vectorscopes, and test charts Using linear, gamma, and log encoded video Image control and grading on the set The tools and basics of film lighting ASC-CDL, ACES and other new methods Optics and focus Camera movement Set operations Green screen, high speed and other topics The world of cinematography has changed more in the last few years than it has since it has in 1929, when sound recording was introduced. This book is illustrated and covers the entire range of the profession. It is not just a comprehensive guide to current professional practice; it goes beyond to explain the theory behind the practice, so you understand how the rules came about and when it's appropriate to break them. In addition, directors will benefit from the book's focus on the body of knowledge they should share with their director of photography. Cinematography: Theory and Practice - Image Making for Cinematographers and Directors from Focal Press was written by Blain Brown and teaches you not only about the equipment and technology, but also about the concepts and thought processes that will enable you to shoot professionally, efficiently, and with artistic mastery. This book is illustrated and covers the entire range of the profession. It is not just a comprehensive guide to current professional practice; it goes beyond to explain the theory behind the practice, so you understand how the rules came about and when it's appropriate to break them. In addition, directors will benefit from the book's focus on the body of knowledge they should share with their director of photography. This book presents the basics and beyond, employing clear explanations of standard practice together with substantial illustrations and diagrams to reveal the real world of film production. Covering the most up-to-date information on film/digital interface, new formats, the latest cranes, camera support and other equipment, it also illustrates classic tried and true methods. The author Blain Brown began his career in New York as a commercial still photographer before starting in the film business. After working as a gaffer, he began his cinematographer career working primarily on commercials and music videos. He has been Director of Photography on 14 feature films as well as national commercials, promotional films, industrials, music videos and documentaries. He has worked in many states in the U.S. as well as Mexico, Canada, India, Italy, France, the Philippines and Jordan. His experience includes 35mm and 16mm projects, as well as 24P High Def, DigiBeta, BetaSP and DV. He has taught courses in storytelling and visual communication, and his books include A Sense of Place; Motion Picture and Video Lighting and The Filmmaker's Pocket Reference.
